B-HIVE  
135 g/mq  
100% POLYESTER

Innovativo tessuto costruito con una particolare trama ad alveare formata da micro camere d'aria. La nuova combinazione di filati riesce a garantire un notevole effetto traspirante ed estrema leggerezza. Una minor quantità di tessuto a contatto con la pelle, grazie alla presenza di minuscole camere d'aria, consente, infatti, una straordinaria regolazione della temperatura corporea e una sensazione d'intenso comfort. Il filato è doppio e composto da fibre di tonalità diverse per ottenere il caratteristico colore "melange", un effetto chiaro scuro ottenuto con una doppia tintura tipica dello stile tempo libero. Dalla mano morbida e confortevole il tessuto segue ogni movimento del corpo con straordinaria naturalezza. Anche il nuovo tessuto B-HIVE è certificato Oeko-Tex® Standard 100 e non rilascia sostanze nocive per la pelle e dannose per la salute.

B-HIVE

B-HIVE  
135 g/mq  
100% POLYESTER

The two-ply thread is made up of different colours in order to obtain the characteristic melange, a light-dark effect obtained with a double dyeing that is typical of the leisurewear style. Soft and comfortable to the touch, the fabric follows every movement of the body with a natural flow. The new B-HIVE fabric is also Oeko-Tex® Standard 100 certified and does not release substances which are harmful to the skin or constitute a health risk.

Tissu innovant réalisé à l'aide d'une trame alvéolée formée de micro-chambres à air. Ce nouveau mélange de fils assure un important effet respirant doublé d'une extrême légèreté. En effet, la présence des minuscules chambres à air réduit la quantité de tissu en contact avec la peau, ce qui régule considérablement la température corporelle et apporte un confort extrême. Le fil double composé de fibres de tonalités différentes présente une couleur chinée caractéristique, un effet clair-obscur issu d'une double teinture typique des vêtements destinés au temps libre. Doux et confortable, le tissu suit tous les mouvements du corps avec un naturel extraordinaire. Le nouveau tissu B-HIVE est lui aussi certifié Oeko-Tex® Standard 100 et il ne libère aucune substance nocive pour la peau ou la santé.

COME FUNZIONA

L'esoscheletro interno dei capi Active Tense® supporta i movimenti naturali del corpo, migliorando la postura senza limitare la libertà di movimento con un effetto stabilizzante sia attivo che passivo.

STABILIZZAZIONE ATTIVA

La stabilizzazione attiva è un supporto graduale ai muscoli e alle articolazioni che serve a migliorare i movimenti naturali del corpo, mantenendoli nel giusto binario ed evitando movimenti potenzialmente scorretti e dannosi.

STABILIZZAZIONE PASSIVA

La stabilizzazione passiva agisce da guida funzionale, suggerendo al corpo come mantenere una postura più appropriata e coadiuvando muscoli ed articolazioni a mantenere un adeguato allineamento.

Active Tense® aiuta, inoltre, a ridurre le vibrazioni a cui sono sottoposti i muscoli e, quindi, l'affaticamento durante e dopo lo sforzo fisico, e a migliorare la propriocettività, ovvero la capacità di percepire e riconoscere la posizione del corpo nello spazio, sensibilità fondamentale per il controllo del movimento. Grazie all'elevato sostegno articolare e muscolare, e la conseguente riduzione dello stress corporeo, Active Tense® può anche promuovere un più rapido recupero post-infortunio.

HOW DOES IT WORK

The embedded exoskeleton in Active Tense® garments supports the body's natural movements by improving posture without inhibiting freedom of movement through a combination of active and passive stabilization.

ACTIVE STABILIZATION

Active stabilization offers graded muscle and joint support aimed at enhancing the body's natural movements, keeping them on the right path and eliminating movements that are wrong or unnatural.

PASSIVE STABILIZATION

Passive stabilization is a functional guide that encourages the body to adopt an appropriate posture and helps muscles and joints to stay properly aligned. Active Tense® reduces muscle vibration and therefore fatigue during and after exercise while improving proprioceptivity, the capacity to perceive and recognize the position of the body in space, a crucial aspect of movement control. Thanks to its exceptional levels of support for joints and muscles and the resulting reduction of stress for the body, Active Tense® also ensures improved post-injury recovery times.

COMMENT CELA FONCTIONNE

L'exosquelette interne des vêtements Active Tense® accompagne les mouvements naturels du corps, améliorant la posture sans limiter la liberté de mouvement avec un effet de stabilisation actif et passif.

STABILISATION ACTIVE

La stabilisation active offre un soutien graduel des muscles et des articulations servant à améliorer les mouvements naturels du corps, tout en les maintenant dans la position correcte et évitant des mouvements potentiellement erronés et dangereux.

STABILISATION PASSIVE

La stabilisation passive agit comme un guide fonctionnel, aidant le corps à maintenir une posture plus appropriée et permettant aux muscles et aux articulations de maintenir un alignement correct.

Active Tense® aide en outre à limiter les vibrations auxquelles les muscles sont sujets et, par conséquent, la fatigue pendant et après l'effort physique ainsi qu'à améliorer leur proprioceptivité, soit la capacité de percevoir et reconnaître la position du corps dans l'espace, ce qui est fondamental pour le contrôle du mouvement. Grâce à l'excellent soutien articulaire et musculaire et à la limitation conséquente du stress corporel, Active Tense® pourrait aussi promouvoir une récupération plus rapide après un accident.
